Education

Bachelor's of Software Engineering

Gandaki College of Engineering and Science (GCES), Pokhara University

Pokhara, Nepal 2021 – 2025

Experience

Backend Engineer – Intern

Brand Builder

Pokhara, Nepal,
Nov. 2025 – Feb. 2026

- Led end-to-end architecture and delivery of a Gen AI-powered personal finance assistant, designing a 4-stage pipeline (OCR ingestion, LLM restructuring, validation, and Firebase storage) that eliminated 100% of manual data entry.
- Independently owned and deployed the complete FastAPI backend using Docker and Railway, achieving zero-downtime production availability within a 3-month internship timeline.
- Directed joint sprint planning sessions, resulting in on-time delivery for 100% of assigned tasks and mitigated key risks associated with integrating frontend and backend systems on time.

Projects

AI Quiz App – Intelligent Assessment Platform [\[Link\]](#)

Python, FastAPI, LangChain, Generative AI, HTML, CSS, JS

- Independently designed and built a full-stack AI quiz platform end-to-end, integrating LangChain with Groq/Gemini APIs to dynamically generate assessments from 3 documents formats (PDF, Word, YouTube transcripts), reducing quiz creation time from hours to under 30 seconds.
- Diagnosed and resolved a real-time response latency problem by analyzing bottlenecks across the LangChain pipeline, cutting average response time by ~40%, and improving user experience for concurrent sessions.

Receipt AI – Intelligent Document Processing System

Python, FastAPI, LangChain, Gemini 2.5 Flash, Firebase, Docker

- Solved a complex multi-modal data extraction problem by architecting a 4-layer pipeline (OCR->LLM->Normalization-> structured storage), enabling accurate processing of diverse receipt formats with zero manual correction.
- Owned the full deployment lifecycle, containerized the service with Docker and shipped to Railway, achieving reliable, production-grade API.

Movie Recommendation System [\[Link\]](#)

Python, Pandas, Scikit-learn

- Designed and deployed a collaborative filtering recommendation engine using cosine similarity, achieving personalized suggestions across a dataset of 5000+ movies with a full preprocessing pipeline covering null handling, encoding, and feature scaling.

PerfectCare NZ – Business Website [\[Link\]](#)

React.js, HTML, CSS, JavaScript

- Communicated directly with New Zealand-based client to gather requirements, translated them into fully responsive, mobile-first React.js website, and delivered a live production site now actively serving real customers with 100% client satisfaction.

Technical Skills

AI & ML: LLMs, LangChain, RAG NumPy, Pandas, Matplotlib, Seaborn Scikit-learn, EDA, NLP

Languages: Python, JavaScript, C/C++, Java, SQL

Backend & API: FastAPI, Django, DRF, REST APIs, JWT

Frontend: React.js, Streamlit, HTML, CSS, Tailwind CSS

Data & Storage: PostgreSQL, SQLite, MySQL, Firebase, Supabase, ChromaDB, FAISS

Tools: Docker, GitHub Actions (CI/CD), Vercel, Railway, Render, Git, Postman
